Reinventing
treatment tables

N'Run ^{EVO}

The ultimate therapy tables

The premium line of physiotherapy and osteopathy tables that stand out from the crowd with their remarkable design. Now, fully evolved with new outstanding features.

01

Oasis! The head section by Naggura

Oasis is a hi-tech foam head section with 2 different densities. Soft for maximum comfort and seamless for optimum hygiene.

Dive into the oasis and get away from reality for a little while.

04

Built-in heating system

The mattress with heating provides gentle warmth to make your patients feel fully relaxed.

The best treatment starts with a warm welcoming.

05

LED lighting

Create a nice and relaxing atmosphere in your therapy room.

Shine a light on your Naggura EVO.

02

Double density cushions

The double padded cushions combine a high-density foam with a soft upper layer. The perfect table for manipulation techniques.

Your comfort zone!

03

Side wings

Treat your patient in the most ergonomic position thanks to the foldable side wings. *Always stay by the side of the patient.*

N'Run 5 ^{EVO}

The N'Run 5 EVO is definitely the flagship of Naggura. It offers best comfort, full ergonomics and optimum finish. Electric height operation via the perimeter foot switch and electric drainage position adjusted by push buttons on the top frame. Equipped with 4 hidden wheels which turn 360°. The best pillar of your work stands on the base of N'Run with cherry on top.

N'Run 5S ^{EVO}

The N'Run 5S EVO is equipped in addition with 2 foldable side wings in the middle section. This multisectional table is completely ergonomic and versatile. Perfect for those professionals who seek staying very close to the patient when they need to.

N'Run

The outset of Naggura *Born to break the rules!*

01

The N'Run style

'Cause you deserve the best treatment table! Pure lines, elegant shapes and technical optimised solutions are the soul of Naggura'n.

Tables that will leave you speechless!

TwinLift by Naggura

Patented armrest system in the head section. Ergonomic, fully articulated by gas lift and lever. The arm supports can be lowered and lifted by the patient himself. The mechanism does not collide with the therapist when sitting in front of the headrest. ***Make yourself comfortable!***

03

02

More power

Fast and powerful engines to make your work easier and help you gain extra time.

Since the driving force of Naggura is you!

05

Spradling upholstery

High-end Spradling © upholstery with Permablok 3 coating technology for optimum quality, hygiene and durability in healthcare environments.

The best skin for your table.

04

Superior stability

The base of N'Run has been designed and built to become the strongest pillar of your work. It offers outstanding stability and guarantees optimal energy transfer during treatments.

In pure solid state!

N'Run 3

3-section therapy table that can be adjusted to multiple positions providing optimum flexibility and comfort. Equipped with 2 engines: electric height operation via the perimeter foot switch and electric drainage position adjusted by push buttons on the top frame. Also available in 80 cm wide. 4 wheels turning 360°.

N'Run 5

5-section therapy table equipped with 2 engines. Electric height operation via the perimeter foot switch and electric drainage position adjusted by push buttons on the top frame. Equipped with TwinLift: the patient can adjust the armrests to reduce tension and get shoulder girdle relaxed during treatments. 4 wheels turning 360°.

N'Run 4

4-section therapy table with 1 engine that controls the height of the table through the built-in perimeter foot switch. Equipped with Twinlift: the patient can adjust the armrests to reduce tension and get shoulder girdle relaxed during treatments. 4 wheels turning 360°.

N'Run 2L

2-section therapy table for treatments on patients lying down in supine, prone or semi-sitting positions. 1 engine controls the table height through the perimeter foot switch, accessible from the 4 sides of the table. Ideal for physiotherapy, rehabilitation and examination. 4 wheels turning 360°.

N'Run 2W

2-section osteopathy table with side foldable armrests. Adjustable head section in positive and negative angles for cervical manipulation techniques. The special working section of 55 cm allows the osteopath staying close to the patient during treatments. Also available with density 70 kg/m³. 4 wheels turning 360°.

N'Go

The sports casual look!

Ready? Steady? Go!

01

The N'Go way

'Cause you are active and dynamic! The N'Go collection of treatment tables highlights by their sports casual look and improved features. Just compact and cool.

Are you ready to go?

02

Head section with double gas lift

The head section of each Naggura table is fitted with 2 gas lifts which allow optimum stability and strength.

Long life ensured for your therapy table!

03

Spradling upholstery

High-end Spradling © upholstery with Permablok 3 coating technology for optimum quality, hygiene and durability in healthcare environments.

The best skin for your table.

05

Handlebar

Ergonomic hand support with a design inspired on a handlebar to be held by the patient when lying in prone position.

Keep a grip on it!

04

Easy access

The N'Go tables go down to 45 cm to give the best welcome to your patients. Perfect height to allow elderly people or patients with reduced mobility to get on the table. Ideal also for those treatments that need the whole weight of the therapist to perform specific manipulation techniques in low position.

Incomparable working ergonomics!

N'Go 5

5-section therapy table equipped with 2 engines: electric height operation through the built-in perimeter foot switch and electric drainage position adjusted by push buttons on the top frame. Equipped with TwinLift: the patient can adjust the armrests to reduce tension and get shoulder girdle relaxed during treatments.

N'Go 3

3-section therapy table that can be adjusted to multiple positions providing optimum flexibility and comfort. The table is equipped with 2 engines: electric height operation via the perimeter foot switch and electric drainage position adjusted by push buttons on the top frame.

N'Go 4

4-section therapy table equipped with 1 engine that controls the height of the table through the built-in perimeter foot switch. Equipped with TwinLift: the patient can adjust the armrests to reduce tension and get shoulder girdle relaxed during treatments.

N'Go 2W

2-section osteopathy table with side foldable armrests. Adjustable head section in positive and negative angles for cervical manipulation techniques. The special working section of 55 cm allows the osteopath staying close to the patient during treatments. Also available with density 70 kg/m³.

N'Go 2L

2-section therapy table for treatments on patients lying down in supine, prone or semi-sitting positions. 1 engine controls the table height through the perimeter foot switch, accessible from the 4 sides of the table. Ideal for physiotherapy, rehabilitation and examination.

Naggura keeps on creating and reinventing premium treatment tables that stand out from the crowd. That's Naggura'n.

Physiotherapy and osteopathy tables born to break the rules. We change the present to build up a new future.
